

Associate Professor Homayoun Zargar, MBChB, FRACS (Urology)

Western Urology, Melbourne, Australia

As an accomplished urologist and Associate Professor affiliated with The University of Melbourne, Dr. Zargar has over a decade of experience specializing in uro-oncology and robotic surgery. He is currently practicing at Western Health and Epworth Richmond Hospital, while also directing Western Clinical Trials, a dedicated research center focused on uro-oncology, benign prostatic hyperplasia (BPH) treatment, and innovative male sterilization techniques.

Dr. Zargar's training includes prestigious fellowships at Cleveland Clinic and the University of British Columbia/Vancouver Prostate Centre, enhancing his expertise in advanced laparoscopic and robotic surgery. Additionally, he completed the Melbourne Uro-Oncology Training Program Fellowship at Peter MacCallum Cancer Centre.

He is actively involved in research, serving as Principal Investigator for several clinical trials, including innovative studies on prostate cancer and benign prostatic hyperplasia. Dr. Zargar is also an editorial board member of several prominent urology journals and has been recognized among the top 1% of reviewers in medicine globally for three consecutive years.

His leadership roles include serving as President of the Iranian Australian Association of Health Professionals (IRAHP) from 2021 to 2024, and Chair of the USANZ Victorian Executive Committee in 2021. He is also an advisor to Kidney Health Australia and various pharmaceutical advisory boards.

Dr. Zargar is passionate about teaching, mentoring medical students, and contributing to the advancement of urology through ongoing research and clinical excellence. Through his work at Western Urology and Western Clinical Trials, he is committed to offering patients state-of-the-art treatments while fostering a collaborative environment for medical professionals.
